Dynamic business landscape

Technological innovation, increasing cyberthreats, and satisfying your employees are only some of the critical considerations modern businesses must make when choosing the right IT partners and computing solutions.

Turn end of support into a new beginning with Dell & Windows 11

Make the switch and maximize benefits

- + Windows 10 PCs* no longer receive security updates, new feature updates and Windows 10 technical support
- + Older devices may not meet Windows 11 requirements, face compatibility issues and lack the latest built-in performance, security, and AI enhancements

Check your system now

*Excluding PCs where an ESU has been purchased.

Step into the future now with advanced AI capabilities and powerful new features that drive success.

76% of IT and business leaders believe GenAI will deliver transformative value for their organization¹

95% of end-users are interested in peripherals that could substantially augment GenAI processing power²

By 2028, 98% of PCs on the market will be AI PCs³

76% of ITDMs said employees with AI PCs will outperform those without AI PCs⁴

Better together

In the face of rapid technology changes, like the wake of AI, businesses need a constant—a reliable IT partner who can help you keep abreast, no matter the pace. Dell Technologies is that partner.

The partnership between Dell, Intel, and Microsoft is not just a collaboration but a seamless synergy that brings tremendous value to your business.

Whether through optimizing workflows, enhancing security, or fostering innovation, this IT powerhouse empowers your journey toward a smarter, more connected future.

Dell + Intel + Microsoft

- + Dell's superior design optimizes productivity and collaboration everywhere.
- + Microsoft Copilot, your AI assistant for improved productivity, creativity and efficiency
- + Device management tools allow easy updates and operational efficiency
- + Improved security with hardware and software layers of defense
- + Copilot+ PCs offer a unique experience with exceptional battery life and turbocharged performance.
- + A more sustainable approach to help you achieve your sustainability goals

Thrive and succeed with Windows 11 on Dell Pro AI PCs

Offering a better choice

Businesses play a pivotal part in the global environmental effort, which is why they must achieve their sustainability targets. Together, Dell, Intel and Microsoft offer innovative solutions to help meet customer expectations of the modern workforce and the green agenda.

of ITDMS agree that they need the help of a third-party partner to achieve their sustainability goals.⁵

Responsible Asset Recovery

For over 25 years, Dell has been helping customers securely and responsibly retire legacy IT, recovering 2.8 billion pounds of used electronics¹ along the way. With Asset Recovery Services, we focus on maximizing reuse to unlock the value of your old equipment, giving you funds to reinvest in your business, drive innovation, and fuel growth. Our streamlined approach ensures retiring IT assets is simple, sustainable and aligned with your business goals.

Product Sustainability

Dell has been a pioneer with the use of recycled, renewable and low-emissions materials in our products. 97% of our packaging is made from recycled or renewable materials,² and we delivered 52 million kilograms of products made from these materials last year alone.³

Usage and Repairs

Intel vPro reduces the need for site visits by remotely repairing, remediating or even retiring PCs. Dell offers access to spare parts and tutorials to help you use our PCs for longer.⁴
